Public Health Imperatives - Programs characterized by services that protect the health and safety of the citizenry against infectious, occupational and environmental hazards; ensure adequate health and medical emergency preparedness and response; and offer protection to vulnerable persons against exposure to severe harm. These services are typically mandated and the public health agency is the sole provider. These services include infectious disease control programs, sanitation services, emergency preparedness and response and public protection services. These programs encompass essential public health services number 1, 2, 6 & 9.
